

# Athlon Green Car Solution

**Employees without a lease vehicle can lease a super efficient vehicle at a low price.**

**This helps companies to reduce considerably the overall CO<sub>2</sub> footprint of their organisation.**

Athlon Green Car Solution is a system that leases a vehicle to an employee who does not qualify for a lease vehicle. The employee replaces his/her private vehicle by a super efficient lease vehicle that will consequently have a strong positive effect on CO<sub>2</sub> emission and air quality. Athlon Green Car Solution is part of the Sustainable Mobility Plan of Athlon Car Lease. We offer time-saving and more efficient alternatives for vehicle usage and thus reduce the CO<sub>2</sub> emission.

## **Low costs for employer and employee**

On average, you as an employer pay about € 80 in travelling expenses per employee. Those expenses are ended when the Athlon Green Car Solution is implemented. Both you and your employees pay € 150 per month. The price includes:

- interest and repayment
- replacement transport
- motor vehicle tax
- insurance
- fuel
- repair, maintenance and tyres

Because the employee's contribution for this vehicle is higher than the addition to the taxable income, the employee has no net tax addition.

## **Guaranteed environmental benefit**

58% of all business kilometres are travelled in private vehicles with relatively high pollution levels. In this respect, the Athlon Green Car Solution will benefit the environment considerably. An employee with an average vehicle could prevent 800 kilogram CO<sub>2</sub> each year by choosing the Athlon Green Car Solution. The employer asks in return that the new lease driver provides a warranty against liability for the sold vehicle. This way we can be sure that the employee is really replacing a less energy-efficient vehicle. Besides, Athlon Green Car Solution not only provides a super efficient vehicle, but also an NS Business Card and agreements to prevent more kilometres and vehicles.

## Advantages

Athlon Green Car Solution has a number of advantages:

- Reducing the CO<sub>2</sub> footprint of all employees
- A clean leasing vehicle at low costs for every employee
- Saving on travelling expenses
- Saving on the use of rental vehicles

## Which vehicles come under the Athlon Green Car Solution?

The vehicles which Athlon Car Lease offers in this scheme are for instance Citroën C1, Peugeot 107 and Toyota Aygo. These models only have a 14% tax addition, because the CO<sub>2</sub> emission is less than 110 gram. We can also apply the scheme to more expensive models in this tax addition class, but the employee then pays a higher amount. For a complete list of the available models, we refer you to our website.

## Proof of participation

This initiative of Athlon Car Lease has been developed with the organisation Natuur en Milieu. You will receive a Green Certificate from Natuur en Milieu when you join the Athlon Green Car Solution.

## More information

Would you like more information about Athlon Green Car Solution? Please contact your account manager or see Products & services on [www.athloncarlease.nl](http://www.athloncarlease.nl).

## Calculation example

36 months/15,000 kilometre per year

All-inclusive monthly price: € 300 per month

- Basic monthly amount employer: € 150
- Contribution from employee: € 150

Reduction CO<sub>2</sub> emission average: (180 -/ - 110 gram) x15,000 km = 1,050,000 gram CO<sub>2</sub>/year

For instance:

Company with 1,000 employees, with 20% of the employees joining

200 employees \* 1,050,000 gram CO<sub>2</sub>/year = 210,000,000 gram CO<sub>2</sub> reduction/year

Net costs (average):

200 employees \* 12 mths \* (€ 150 - € 80) = € 168,000 (+ € 51,000 VAT for private use)
