

Athlonline

Athlonline: the online leasing platform from Athlon Car Lease, allowing you fast and easy access to the most current and complete information available.

Fast and simple

Would you like to manage the whole process of choosing, ordering and managing your fleet of lease vehicles with one system? Fast and simple, with information that is always up-to-date and is available 24 hours a day, seven days a week? That is what Athlon Car Lease is pleased to offer you our online leasing platform, Athlonline. Using Athlonline will save you time and effort when it comes to managing your fleet.

Current and usable

Athlonline is linked directly to our own administration. This guarantees that the information is up-to-date. The vehicle information can be accessed directly and an online quotation always represents the most current version.

Also easy for those driving lease vehicles

Athlonline is also a handy system for drivers of lease vehicles. They can, for example, easily select and order their lease vehicle. Naturally, this is done in accordance with their specific lease regulations and

your digital authorisation. Furthermore, it is also possible to look up contract and address information whenever you wish.

Plenty of options

Athlonline consists of various modules, making the system even easier to use.

Selecting a lease vehicle

For many, the selection of a new lease vehicle is a pleasant activity. It is however, time-consuming to find the right information with regards to the different vehicle makes and models. Your lease vehicle drivers can use the Car Search module to search for a vehicle which conforms to their lease vehicle policy. This way the lease vehicle driver can easily find the right information and the vehicle that suits him best.

Calculating the (monthly) vehicle leasing rate

Has a lease vehicle been selected? Your lease vehicle drivers can then use the Calculator to apply for the vehicle. The Calculator calculates the current (monthly) vehicle leasing rate . Your lease vehicle

drivers will know exactly where they stand. In addition, all possible options and all additional options are associated with the makes and models, thereby allowing your employee to order the vehicle with all the desired extras. Of course it is also possible to save search results in order to return to them at a later time, or to compare them to other search results. You and your lease vehicle drivers will have access to the right information, without having to wrestle through piles of paperwork or waste time calling and faxing with your vehicle leasing company.

Ordering a lease vehicle

Your lease vehicle drivers can order their lease vehicle directly using Athlonline. In order to prevent them from ordering a vehicle which does not conform to their leasing regulations, we configure Athlonline according to your wishes. A lease vehicle driver knows precisely which vehicles he may and may not choose. The Order Management module allows you to specify this for all your lease vehicle drivers simultaneously and/or individually. Would you like to ensure that your lease vehicle drivers always acquire permission before ordering a vehicle? We can arrange that (requests for) orders from your lease vehicle drivers must always be authorised by you first. This allows you to always maintain control over your fleet.

A custom profile

Athlonline offers many options. But maybe you don't want all these to be accessible to everyone. The Profile Management module allows you to determine which parts are accessible to your lease vehicle drivers. You can create a separate profile for each of your lease vehicle drivers, where you determine which parts are available and which are not. It is also possible to set up a basic profile which can be applied to all or some of your lease vehicle drivers.

Up-to-date information

The administration of your fleet is also faster when using Athlonline. The Data Management module ensures that keeping your administration up-to-date is a simple task. This means that you will not have to contact your vehicle leasing company for every small change. You can make these changes yourself, or you can let your lease vehicle drivers make these changes using Athlonline.

Lower costs, more convenience

Are there vehicles in your organisation which are available early? These can be added to Athlonline's Recontracted Vehicle module so they can be offered to employees who are searching for a lease vehicle. Your lease vehicle drivers will be shown these vehicles before they search through the new vehicles. This saves you the cost of recalculation and turning in the vehicles, and it saves you the effort of extra work and delays. In short, more convenience and lower costs.

More information?

Would you like more information, or the opportunity to see Athlonline 'live'? We would be happy to arrange a demonstration to show you what Athlonline can mean for you. If you are interested, please contact your account manager.
