

# Autofocus

**You would like to see the status of your fleet quickly and easily. For that, you require current and complete information. Athlon Car Lease offers you Autofocus, the online management reporting system, which provides information on your fleet 24 hours a day, 7 days a week.**

## **Up to date information**

Would you like to have access to the most current information on your fleet at all times? Fast, complete and at your convenience? Autofocus offers you the perfect solution. It provides online access, any time of day or night, to all kinds of relevant information regarding your fleet. Autofocus identifies areas which require your attention as they arise, so that you can make the necessary adjustments.

## **Clear and complete**

Autofocus offers several types of reporting, including contracts, costs, deviations and orders. All information is organised into categories. One simple click on the category name will show you what information can be found in the reports.

Moreover, Autofocus offers you several statistical indicators for your fleet in one clear overview: the number of active contracts, the number of vehicles

on order, the average vehicle odometer reading, the average age of your fleet in months and the average (monthly) vehicle leasing rate.

## **Complete reports**

Autofocus shows you the reports in three convenient categories.

### Deviations

You can easily check to see if your lease contracts are about to expire for mileage, fuel consumption, maintenance or damage. In case a contract deviates too much from the standard set by you, Autofocus will show the percentage of the deviation in green (for a positive deviation) or red (for a negative deviation). You can see where your attention is required at a glance.

## Finance

To monitor your lease costs, you can make use of various reports. Autofocus offers the reports you need when drawing up your yearly accounts. You have access to a complete overview not only of your remaining lease commitments, but also of your fuel expenses within a specific period. You can determine for which specific period you would like to view the information.

## Fleet

Your fleet may vary on a daily basis. The reports in Autofocus provide you with clear information for all contracts which will expire within a specific period, including the start date of the contract, the odometer reading and, if necessary, a link to the order. You can also consult all orders, showing, among other things, the expected delivery date. Are you interested in more detailed information regarding your contracts? Simply request the 'Contract Details' report.

## Adjustments

Autofocus offers you an overview of all the relevant cost developments at a corporate level and at the level of the lease vehicle drivers. Using the standard deviation information, set by you, the system detects and indicates the deviation in mileage, fuel expenditure and consumption, maintenance and damage. All you have to do is indicate at which point you would like to receive a report on cost developments. Autofocus delivers a report containing the relevant information directly to you. This allows you to make adjustments directly without negatively affecting the overview.

## Easy

For your convenience, reports can be printed or exported to an Excel sheet quickly and easily using Autofocus. This allows you to edit the data further. Additionally, you can determine who in your organisation should have access to the information in the system. For each level, you can determine who has access to Autofocus and who has editor rights, based on login names and passwords.

## The advantages

Autofocus provides:

- All relevant information at a glance
- Quick and clear understanding of the origin of any discrepancies in the operating costs
- No more loose folders and spreadsheets, allowing you to work more efficiently
- The ability for you to operate your fleet actively, ensuring cost reductions

## More information?

Would you like more information, or the opportunity to see Autofocus 'live'? We would be happy to arrange a demonstration to show you what Autofocus can mean for you. If you are interested, please contact your account manager.
